

Registry Internet Safety Group

R.I.S.G.

www.registrysafety.org

- Facilitate dialogue and collaboration,
- Affect change, and
- Create and adopt best practices to address Internet identity theft

The Purpose of RISG

- **gTLD Registries:** Afilias Limited, AusRegistry, NeuStar, Public Interest Registry, and Verisign
- **ccTLD Registries:** SIDN (.NL), CNNIC (.CN), .NZ, and Nominet (.UK)
 - Major ccTLD registries provide expertise and global perspective
- **Internet Security:** Cyveillance, Internet Identity, MarkMonitor, McAfee, Shinkuro and Symantec Corporation
- **Global Law Enforcement:** FBI & UK
 - Law enforcement perspective on Internet crime and solutions
- **Registrars:** GoDaddy, MarkMonitor, Melbourne IT, Network Solutions, SnapNames
- **Chair:** Alexa Raad, PIR | araad@pir.org
- **Vice Chair:** Roelof Meijer, SIDN | roelof.meijer@sidn.nl
- **Secretary:** Greg Aaron, Afilias | gaaron@afilias.info

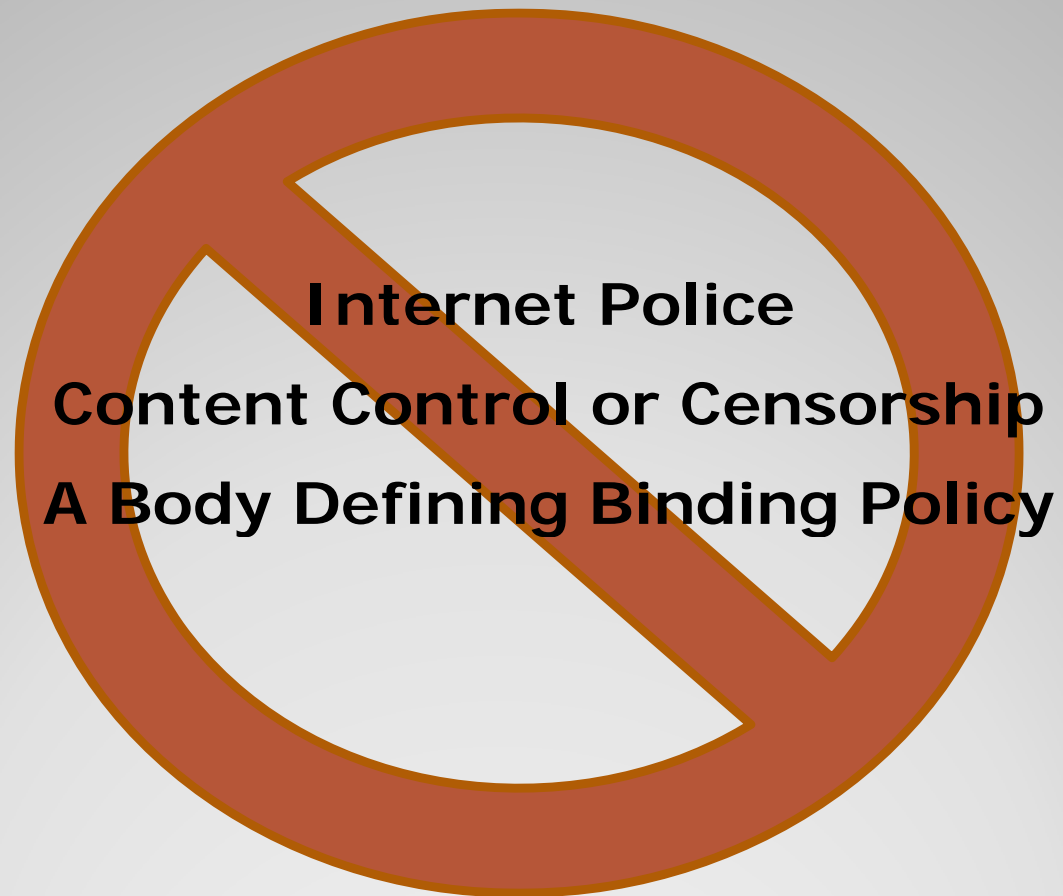

RISG Members

- **Members represent multiple capabilities and interests**
 - Best possible view of issues
 - Range of viewpoints
 - Ability to see multiple angles of each issue

Best Chance for Achieving Effective Remedies

Complete Value Chain

What RISG is Not

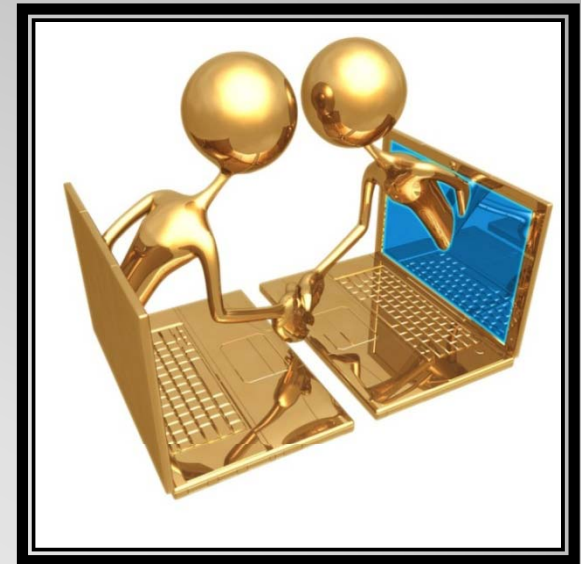

Internet Police

Content Control or Censorship

A Body Defining Binding Policy

- **For the members:**
 - Industry collaboration
 - Proactivity on our part avoids unnecessary regulation later
- **For the industry:**
 - Consistent and effective processes regardless of TLD
- **Safer Internet for all users:**
 - Minimizes damage as problems are identified quicker and resolved sooner
- **Develop and Increase Global Perspective**

RISG Benefits

- **Best Practices Data Sharing Plan**
 - Identify curative & preventative goals and associated use cases
 - Identify data relevant to each use case
 - Comply with legal requirements for data sharing

- **Anti-Phishing**
 - What types of threats to handle?
 - How to respond to the threats?
 - Identify reliable data indicators of Phishing.
 - How to work with law enforcement?

What are we doing?

- Adopt domain suspension at the registry level?
- Positively identify Phishing Sites across TLDs
- Adopt consistent policies across TLDs to minimize domain abuse

Explore Options and Best Practices to Stop Internet Identity Theft

- **Internet Community Participation**
 - Particularly ccTLDs
- **Global Law Enforcement Cooperation**
- **Communication of our findings and best practices**
 - Followed by voluntary adoption

What RISG Needs to Succeed
